Lions Column

IT'S GREAT TO BE A LION

The man who spends all of his time in running his business is neither a good business man nor a good citizen. He needs to see beyond the competitive circle and see what he is doing in relation to the country as a whole. Of course a man often misses this point and one day he finds that his success has turned sour. His world, was no larger than his ledger. World events have been pushed aside by business. The community has grown without him and he is a stranger in his own country. New business men have moved in. Main Street has grown too wide and too long for him. He votes "no" on every issue; the corners of his mouth droop; he is just another man who defeated himself in the business of living.

But where men forget their own business a few hours each week and meet on a high plane of community and civic concerns these men will be building a strong nation because a nation's strength begins with people in their local environment. And besides, they will be happy.

CARBON NEWS

We noticed while at the village office during the voting on Monday the the new fire siren, part of the equipment purchased last year, is still resting in the office of the secretary. We understand that the siren is ready for use, all you have to do is break down the door, hunt for a couple of wires, attach them to the wires already on the siren, and presto, the department is wakened up and come a running to fight the fire. In the meantime the building that is on fire is merrily blazing away. Why not install the siren in some central point in the village, and NOW!

—★—
"R. B." and Helen Gablehous are visiting with Mr. and Mrs. Jim Hunt.

—★—
Calgary visitors this week included Mr. and Mrs. M. Switzer, Len Poxon and Bob Shaw, and Jim O'Rourke.

Ernest Fox

New Councillor

The village office was a hive of activity on Monday last when 163 voters cast ballots in the first village election in many years. Ernest Fox was elected councillor for a term of three years, receiving 91 votes. The other candidate, John J. Forsch received 72 votes.

Lambert Resigns

Wm. E. Lambert of the Carbon teaching staff has tendered his resignation, effective June 30th, 1948.

"I have just read the item re the annual school meeting which appeared in last week's Chronicle," stated Mr. Lambert in his letter to the secretary of the school district. "I feel that the criticism of the discipline at the school is not based on fact and therefore is both unjust and unfair," Mr. Lambert continued.

"I would like the Board to accept my resignation as of June 30th, 1948."

In reporting the annual school meeting in the Chronicle last week we stated in regard to discipline that "it was recommended to the Board that more strict discipline be maintained both in the school and on the playgrounds."

New Seed Treatment Method Introduced

Introduction of a new method of seed disinfection which is expected to replace the old fashioned formaldehyde sprinkling can and shovel methods is announced.

Known as the "slurry" treatment it is claimed to be the most significant advance yet made in the control of such seed-borne plant diseases as cereal smuts, root rot, damping off, seed decay and certain types of seedling blight.

The new treatment involves mixing certain fungicides with water to the consistency of buttermilk in a special "slurry" machine. A measured amount of slurry is metered out in such a way as to be intimately mixed with a specified quantity of seed.

In this way an equal amount of chemical is applied to every bushel of seed without the resultant waste in over treatment or unsatisfactory results from use of insufficient chemicals. Machines are so designed that by slight adjustments a wide variety of crop seeds can be treated.

A further advantage of the slurry method is the elimination of the disagreeable features and health hazard created by the dust which always accompanies the use of fungicides in powder form. Since moisture content of seed is increased by not more than 0.5 percent it can be bagged and stored immediately after treatment.

There will be a Whist Drive and Card Party in the Legion Hall on Wednesday, March 3.

In the Legislature

By H. C. HAMMELL, M.L.A.

Through the courtesy of the editor of this paper it is my intention to again, as in the past, bring to you each week some of the highlights of the present Session. I will endeavor to give the high spots of the more important bills, motions and debates coming before the members.

With more than usual color the present session got under way on Thursday last, when the Speech from the Throne was read by Chief Justice Harvey, acting for Lt.-Governor J. C. Bowen; the Lt.-Governor was ill. The motion to adopt the Speech from the Throne was moved the following day by J. C. Lander-you, M.L.A. for Lethbridge, and was seconded by the member for Peace River, Wm. F. Fillisland. The Throne Speech forecast considerable legislation in the direct interests of the farmers of this province. It includes wider services by District Agriculturists, Home Economists and Agricultural Service Boards; it promised the completion of the Animal Pathological Laboratory; the extension of irrigation; and an enquiry into the feasibility of building a dam on the Red Deer River for electric power and irrigation purposes. The government is going to make a comprehensive enquiry into the cost of farm production.

Every assistance is promised to continue the search for oil in the province in an attempt to overcome a general shortage of this much needed commodity. A survey of the natural gas picture will be made to insure there are no exports until the supply for Alberta citizens is assured.

Three new full-time health units will be established and a mobile mental hygienic clinic will be organized to serve the needs of the northern part of the province. Work will start this year on a new 200-bed T.B. sanatorium.

Continued road building expansion, as part of the government's five-year road program, will form a large part of this year's activities. It seems likely that increased grants for municipal road construction and im-

provements will be made this year.

A bill has already been introduced which will eliminate Daylight Saving Time in the province.

The early days of the new Session show the dismissal of one deputy minister, L. Byrne, who was in the department of economic affairs and, at the same time was technical adviser of the Social Credit Board. His dismissal resulted in the Premier requesting the resignation of the minister of education, R. E. Ansley. Both these men persisted in following policies opposed to the present administration. The new minister of education is Mr. Van Casey, member for Okotoks-High River. Mr. Casey has had a good many years experience teaching in the province, as well as business experience in High River and is well fitted for the new post.

CARD OF THANKS

We wish to extend our heartfelt thanks to all who so kindly assisted and for expressions of sympathy and beautiful floral offerings received during our recent bereavement.

Mrs. F. Heath and Family.

Legion Notes

A general meeting was held Monday, Feb. 23 at 8 p.m.. The meeting was called to order by the president and the minutes of the last meeting were adopted as read. The financial report for 1947 was called for and the secretary read an audited statement. This also was adopted as read.

A motion was passed calling for an open meeting to all clubs and organizations in the Carbon district for the purpose of a plan to build a community hall. All organizations will be notified by letter as to the time and place of this meeting.

Members are urged to support the IODE tea on Saturday. Leslie Obbarty was appointed caretaker of the hall.

The Legion Parcel for Britain Fund is still open for donations.

Engagement

The engagement is announced of Phyllis Mae Hunt, youngest daughter of Mr. and Mrs. H. Hunt, Carbon, to Mr. William Bruce Waldron, only son of Mrs. E. Waldron of Swallow. The wedding will take place in March.

When a fella loses his shirt...

That's when a man is really down. A fellow risks everything else before he parts with his shirt. That goes last. He values it too much.

The expression *lose your shirt* is used for good reasons. A good cotton shirt is something to cherish. The same amount of money could buy nothing of similar quality.

That applies also to cotton bed sheets, handkerchiefs, gowns, and scores of other items of daily use that are made of cotton. Cotton with its freshness, its washability, its resistance to sun and heat and its durability gives top value for your money.

You can bet your shirt on that!

Manufacturers of Tex-made products

The Rising Cost Of Living

RISE IN LIVING COSTS HAVE BEEN CAUSING concern in all parts of Canada during the past few months. On December 1st, 1947, the cost of living index stood at 146, and it is expected that when the next report of the Dominion Bureau of Statistics is made public in February, this figure may show an increase, due to the continued advances in the prices of some commodities. Some time ago, officials of the Dominion Department of Finance predicted that the cost of living index would not likely go higher than 145, but it now appears that it may exceed that figure considerably. In 1920, which was the peak year of inflation in Canada following the First Great War, the cost of living index was 145.4, which was a record for high living costs in the Dominion. In calculating the present cost of living index, the basic figure of 100 represents price levels between the years 1835 and 1939.

Rapid Rate Of Increase

The figure given for December 1st, 1947, shows that the cost of living is now almost fifty per cent. higher than it was in the basic period, and that it has risen 18.9 points in the past year. Since April, 1947, the increase was shown to be 15.4 points, indicating that there was a rapid advance in prices between April and December of last year. Although the prices of almost all goods have risen, increases in the price of food are believed to be the main cause of the rapid rise in the cost of living index. Such decisive upward trends in living costs indicate inflation, which is apparently an unavoidable accompaniment to the economic upheaval caused by war. Through price controls, subsidies, and other measures, Canadians were for some time protected from inflation, but it was inevitable that these controls should eventually be lifted and that we should pass through a period of economic adjustment.

Warned Not To Over-Expand

It is to be hoped that we may this time be able to avoid the pattern of past periods of inflation, when prices and wages continued to rise in a spiral that ended in economic disaster. Financial experts are of the opinion that we may safely pass through this period of inflation, but they warn industries against over-expansion in the matter of buying expensive equipment, counting on continuing high prices and large profits to meet their costs. They also advise no slackening of effort on the part of either labor or management in our industries or in the development of our natural resources. Without doubt Canada is now passing through a very critical time in her history and one which will lead either to a state of sound progress and development or to a depression. No one can foretell exactly what will happen but there are many who believe that, with increased markets for Canadian products both at home and abroad, we will continue to enjoy a large measure of prosperity. It is to be sincerely hoped that this may be the course which the country will follow and that the present trend toward inflation will not lead to financial disaster.

MOUNTED POLICE WIFE TELLS OF LIFE AT AKLAVIK

REGINA.—Saskatchewan blizzards held no terrors for Mrs. C. E. Rivett-Carnac when her husband was transferred here as assistant commissioner commanding the R.C.M.P. in Saskatchewan.

The first 2½ years of her marriage were spent at far-northern Aklavik, near the mouth of the Mackenzie River, in a small frame building with "good old oil lamps and a wood stove in every room."

The mail came by plane six times a year and usually meant a sleepless night as letters had to be answered before the plane left again in the morning. Christmas gifts came by boat in July, and frequently Mrs. Rivett-Carnac was alone for five or six weeks while her husband was on patrol.

A former Regina girl, she recalled her daughter Beverly, who was born at Aklavik, made a big hit with the Eskimos because of her blond hair and blue eyes. They even made her a special little parka with boots.

Although she insists she "didn't mind too much" her stay at Aklavik which started in 1933, she confesses she was "awfully glad to be home."

English Climate Hits Eskimo Girl

FELIXSTOWE, Kent, England.—Rebecca, 15-year-old Eskimo girl who returned to England with Mrs. John Turner, widowed by an Arctic shooting accident, hasn't taken kindly to this island climate—she's had a succession of colds since her arrival.

Otherwise she's settled easily into English ways, although unable to speak the language and "a little homesick whenever she hears of anyone going to Canada," said Mrs. Turner.

THE AVERAGE AUSTRALIAN

CANBERRA.—The average Australian male, according to a survey, weighs 142 pounds, has a chest measurement of 34 inches and "very bad" teeth. He earns a little over \$6 (\$20) a week and every week smokes about 2 ounces of tobacco, drinks about one quart of beer and goes to a movie once. He buys one dark suit and one light suit a year.

"While Deacon Brown passes de plate," announced Parson Black, "de choir will sing 'Salvation Am Free'. But please remember dat while salvation am free, we has to pay de choir for singing about it."

SPEEDBOY—Four-year-old George Howard Cole, of London, England, is a "veteran" motorcyclist of six months' standing. The boy, son of a speedway rider and builder of motorcycles, had crowds gaping when he careened up to Henley Hall, London, to drop in at the Motor Show there. Young Cole rides a specially built motorcycle with which he has done 45 miles an hour on a dirt track.

FUNNY And OTHERWISE

She: "I'm going to speak my mind."

He: "Ah! Silence at last!"

"You have no speedometer in your car?"
"No need — if I do forty the lamps on my car rattle—at fifty the whole car rattles — higher than that my teeth rattle."

Prisoner — It is difficult to see how I can be a forger. Why, I can't sign my own name.

Judge—You are not charged with signing your own name.

Captain Jevons (introducing an acquaintance to his old aunt).
"This is my old friend Jones. He lives on the Canary Islands."
"How interesting," murmured old auntie, and gathering all her wits she added, "Then, of course you sing."

"Come, come, Joan, surely you know if the world is round or square?... Mary, tell her."
"It's crooked, teacher," said Mary, daskly. 2763

World Demands On Canada's Resources

Breakthrough Of New And Untapped Areas Inevitable

(By The Canadian Press)

The frontiers of Canada's natural resources have been under steady pressure of expanding world demands for raw materials—notably oil, mine and forest products—until today it is widely believed that a breakthrough into new, untapped areas is inevitable and within the foreseeable future.

The unending reconnaissance on one of these frontiers was described by a small group of men—engineers, geologists and prospectors employed by an exploration company interested in the mineral possibilities in the northwest territories. For three years the group, financed by private interests in Toronto, has been exploring the area stretching east of Yellowknife over to Hudson Bay and from the Manitoba boundary line north to the Arctic islands. Although primarily in search of gold, the group reported indications of substantial deposits of other minerals.

In another direction, preparation to exploit the vast iron ore deposits in Labrador has advanced rapidly and large numbers of men are engaged in mapping out and developing the territory. With the rapid deterioration of the older iron ore fields in the north-central areas of the United States, it has been said that the iron

MANITOBA'S HEALTH REPORT

Cases of communicable diseases reported to the Department of Health and Public Welfare, Province of Manitoba for the four week period November 29th to December 27th, 1947, were as follows:

Anterior poliomyelitis 4; chicken-pox 229; diarrhoea and enteritis under one year 9; diphtheria 6; encephalitis 0; erysipelas 3; influenza 12; measles 112; meningococcal meningitis 1; mumps 86; lobar pneumonia 1; scarlet fever 15; tuberculosis 98; typhoid fever 2; and whooping cough 85.

Altogether in 1947, 599 cases of poliomyelitis were reported and there were 8 deaths. Very few of the 591 will have any permanent crippling as the disease was of a milder type than usual.

There were 82 cases of encephalitis and six of these died in 1947.—Health and Welfare Education.

and steel industry will gradually shift to the eastern seaboard and thus bring new emphasis to the industrial life of the continent.

Intensified activity in the Canadian forests is best exemplified in the pulp and paper industry where modernization of equipment and rationalization of processes has brought the industry new production records. Greater emphasis is now directed toward fuller utilization of the "waste" products of that industry.

With the increasing shortage of oil in the United States, the Leduc oil field assumes even greater importance. Continued exploration of that northern Alberta field has brought in new wells, and authoritative geologists consider it a potential giant among north American oil fields.

WORLD HAPPENINGS

BRIEFLY TOLD

Russian newspapers reported the assassination of Mohandas K. Gandhi in two paragraphs, noting that the killer spoke English.

Of Jamaica's 250,000 children between the ages of seven and 15, 177,000, or almost 71 per cent., are attending primary schools of which there are nearly 700.

Latest fashion in Germany is a suit that provides men with a "new look". It is made from 95 patches sewn together and there is a choice of 18 designs.

Vivien Adlard Tremaine, 66, former Red Cross nurse and attendant to King George V during his illness in 1915, died in Jeffery Hale hospital, Quebec, following a lengthy illness.

Although his operation of taxicabs from a Friday the 13th in 1913, Wilbert (Red) Jackson, Brockville, Ont., operator, is able to point to almost 35 years in the business without a serious accident.

Sir Ian Frazer, blind British member of parliament, recently officially opened a miniature rifle range at Brighton, Eng., for blind servicemen. The range is 15 yards long and has a single target with a mounted rifle.

Canada's oldest living triplets—William and James Bent, of Palmerston, Ont., and Mrs. Albert Corbett, of Swift Current, Sask.—have celebrated their 83rd birthday anniversary.

A solicitor in Sydney, Australia, has accepted the trusteeship of 60 lizards belonging to a friend who died, because of an interest in the study of reptiles. He has grappled with 20-foot pythons, so the lizards are no problem.

Salada Tea Sales Increase

The year 1947 showed substantial increase over '45 and '46 in Salada Tea Sales, the total volume being almost double the average annual sales from 1935 to 1939.

This firm, from the first time they packaged Tea depended for their success on two main factors, a strict supervision of quality of their product and advertising to the public through newspapers.

This is their fifty-sixth year of tea packaging and their newspaper advertising programme is undiminished—truly a guide of how to succeed in business for newcomers in other lines—quality goods and advertising.

10,000 DUTCH FARMERS COMING TO CANADA

THE HAGUE. — The Rotterdam Lloyd Lines' motorship Kota Intent will sail for Canada March 12 on the first of seven trips planned this year on which 10,000 Dutch farmer immigrants and their families will be transported to the Dominion, it was announced.

FRENCH SCIENTIST SAYS NERVES AN ENEMY OF BEAUTY

LONDON.—A calm life and a busy one is the recipe for beauty, said French scientist Dr. Francois Debat on a recent visit to London.

Debat says the time is coming when rejuvenation will be possible—but that is for tomorrow. Meanwhile nerves are a great enemy of good looks. 2763

The Trochu Memorial Arena

Trochu Memorial Arena

In April of 1947 plans were made by the Trochu, Alberta, Elks to build a Memorial Arena in honor of the gallant men of the district who had given their lives in the recent war.

Shares were offered in an effort to raise money and in the first two days \$10,000 was collected. The Arena has cost approximately \$20,000, although part of this sum went into a curling rink, not yet completed, which is to have four sheets of ice. Only \$3,000 has been spent on labor, as for the most part work has been voluntarily given.

Work commenced in June and just five months later the Arena was ready for use, though there is much still to be done. Steam heating equipment is to be installed and the building insulated.

The ice surface is the standard

200x85 size and the building itself is approximately 100x240. The north end of the Arena is a large waiting room where lunches are served during intermissions, and several dressing rooms. There is seating capacity for over a thousand people and standing room for nearly six hundred. This space was entirely filled for the official opening on January 9th.

Walter Anderson, Exalted Ruler of the Elks and John Hanna secretary were active in the enterprise. John Frere, chairman of the building committee, worked untiringly for the success of the project, assisted by C. M. Kane. The finance committee were ably directed by J. P. Ferguson.

This gigantic project so successfully accomplished is a tribute to the co-operation displayed by the 1,000 citizens of Trochu and district.

The Arena pictured under construction

OAT EXPORT PERMITS TO BE MADE AVAILABLE

WINNIPEG.—The Canadian wheat board announced it will accept applications for export permits covering shipment of a limited quantity of mixed feed oats to Sweden or Greece. Shipments will be from Lakehead or Georgian Bay ports after opening of lake navigation, or from Vancouver.

The equalization fee will be the fee in effect at time of application.

TREE YIELDED MONEY FOR WESTERN TRAPPER

HUDSON BAY, Sask.—You can't tell W. D. Bennett that money doesn't come from trees—he knows better. Bennett operates a trapline east of this northeastern Saskatchewan town and found one of his traps had been dragged away. Following the tracks, he finally found the trap up a tree—still holding a large fisher whose pelt was valued at \$100.

THIS CURIOUS WORLD

By WILLIAM FERGUSON

LITTLE REGGIE

KIND TO HIS CAR

TELL CITY, Ind. — The Model A Ford belonging to Irvin Richards was stolen, but Richards still had the car's welfare at heart. He put an ad in the local weekly asking that whoever stole the car come around and pick up a gallon of hard-to-get anti-freeze.

PHONE CONSTRUCTION

EDMONTON. — An outlay of approximately \$600,000 will be made by the Alberta government telephone system on a new toll exchange now under construction just west of the city telephone building, it was learned recently.

WEAK, NERVOUS CRANKY "Every Month"?

Then Try This Remarkable Medicine!

Are you troubled by distress of female functional monthly disturbances? Does this make you suffer, feel so nervous, weak, tired—at such times? Then do try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms!

In a recent test it proved very helpful to women troubled this way. You owe it to yourself to try it.

Pinkham's Compound is what is known as a uterine sedative. It has a soothing effect on one of women's most important organs.

NOTE: Or you may prefer LYDIA E. PINKHAM'S TABLETS with added iron.

Lydia E. Pinkham's VEGETABLE COMPOUND

For over 70 years thousands of girls and women have reported benefit. Just see if you, too don't report excellent results. Worth trying!

A Successful Advertiser's Ideas

John Wannamaker, founder of the John Wannamaker store, Philadelphia, was the first advertising genius in the retail advertising field. In addition to the novelty of his advertising, he kept persistently at it. He once said:

"Continuous advertising, like continuous work, is most effective. If there is any enterprise in the world that a quitter should leave alone, it is advertising. Advertising does not jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day, year by year, until it exerts an irresistible power. To discontinue your advertisement is the same as taking down your sign. I would as soon think of doing business without clerks as without advertising."

HERE'S HOW YOU CAN...

Save yourself bother-

AND SAVE YOUR MONEY TOO!

On the back of your War Savings Certificates, you'll find instructions to endorse and mail each one to Ottawa as soon as it matures.

Then—to make ready cash available—you'll have to deposit or cash the cheque for each Certificate as you receive it.

You can, if you wish, go through all this procedure many times over... month by month as each one of your Certificates comes due.

But if you haven't the time or inclination to turn the whole job over to the Bank of Montreal:

Simply take all your Certificates to your nearest B of M branch... you'll find the Bank glad to open an account especially for this purpose. As your Certificates mature, they will be cashed and their full face value deposited in your account... automatically.

You will be surprised at the low cost of this service.

**SAVE YOURSELF BOTHER AND MONEY—
BRING YOUR CERTIFICATES TO THE
NEAREST B OF M BRANCH TODAY**

Don't let the security represented by your War Savings Certificates slip through your fingers... use their proceeds to build up your B of M savings account.

You'll be helping yourself to extra happiness tomorrow... and you'll be helping Canada to win today's battle against inflation.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817

The World of Wheat Another Wheat Agreement

Representatives of a number of nations at Washington are now once again making a determined effort to forge an International Wheat Agreement. For 6,000 years Emperors, Kings and governments have tried to fix the price of wheat and to make such agreements. They all dismally failed. No one ever succeeded. If this effort succeeds it certainly will be in the interests of consumers and at the expense of our prairie producers who will receive lower prices than they should. The last International Wheat Agreement made was in 1933, when 22 nations signed. Within a year the Agreement broke down, as all others previously had done.

I have just read a dispatch from Bismarck, North Dakota, which states as follows: "The North Dakota Farmers Grain Dealers' Association, representing 50,000 grain producing farmers in North Dakota, recently in annual convention passed a resolution voicing their opposition to the participation by the U.S.A. in any International Wheat Agreement, expressing their belief that with such an International Agreement interests of producers and farmers would be sacrificed in order to give cheap bread to the consumers of the world. The farmer would surely pay, and in addition, production would be curtailed and so in the end the consumer himself would not benefit."

Flax Pays Big Dividends

Flax has again proven to be Western Canada's biggest "money crop" in cash returns per acre. Attention was drawn to this fact recently when the Dominion Government announced that Canadian flaxgrowers would receive an additional bonus of 50 cents per bushel for all flax delivered or to be delivered during the 1947-48 season.

This final payment brought the basic price of flax this season to \$5.50 per bushel.

It has been estimated by the authorities that when the new bonus has been distributed, Canadian flaxgrowers will have received an additional \$6 million for this much needed commodity.

Another large building program is in sight in Canada during the coming season. In addition industrial needs will require large quantities of flax and the export market also offers attractive possibilities.

BEISEKER NEWS

Born to Mr. and Mrs. Ernest Little, a daughter, February 21.

The annual Beiseker Bonspiel is being held this week. Complete results next week's Time.

Misses Joyce and Vivian Verhaest were week-end visitors in Beiseker.

The election of a new council-

lor was held in Beiseker on Monday. Leo Schmaltz was elected. Number of votes for each were Schmaltz 85, Adam Velker, 41.

A few drops of cod liver oil a day will help save millions of undernourished children in Europe and Asia. Help by answering the Canadian Appeal for Children.

A heavy heart leads to a heavy hand.

Don't Let Your War Savings Certificates Investment Slip Away

Use the proceeds of your War Savings Certificates to help you toward the things you want most, and to help you meet tomorrow's opportunities and emergencies. That's what far-sighted folk are doing with their Certificate money.

Many of these wise people are simply bringing all their Certificates to the Bank of Montreal for safekeeping until they mature. Then the B of M redeems them automatically and credits the money to the owners savings account. The cost for this service is very low.

Why not drop your certificates in at your B of M branch tomorrow? Dan Ruselr, Local manager, says he will be glad to open a special account for this purpose for anyone who has not already a B of M savings account.

1,500,000 jobs were filled through the National Employment Service in twenty-two months—January, 1946, to November, 1947.

421,146 of these jobs were found for veterans.

5,534 more were found for persons in the higher earnings bracket through the Executive and Professional Division of the Service.

26,531 more of these placements were made through the Special Placements Division for physically handicapped workers—

204 for persons totally blind, 825 for persons totally deaf, and 53 for persons handicapped by double amputations.

Make full use of your local office of the National Employment Service.

Seed Prizes For Barley Growers

One hundred and twenty regional winners in the western division of the 1947 National Barley Contest sponsored by the brewing and malting industries are to get 1,200 bushels of registered certified seed of an approved malting variety in addition to their cash prizes.

In each of the three provinces which comprise the Western division of the contest, there are 40 regional winners. Each will get 10 bushels of seed barley.

In Alberta Montcalm is being distributed in some parts and Olli in other areas where it has been found that for various reasons Montcalm does not do so well.

If men and nations took more stock of themselves they would take less exception to their neighbors.

Green Cross

FIELD SPRAYER

Control weeds in grain with your own Green Cross Field Sprayer. It fits onto the frame of most farm tractors... has direct power drive from tractor pulley... and booms swing back for fence posts and other obstacles. Special low-gallage atomizing nozzles save water... give more thorough coverage. The Field Sprayer, plus a supply of Green Cross Agricultural Weed-No-More, gives you everything you need for modern, efficient weed control. It's an investment that pays for itself in a single year. For further details, call on us today. *Reg'd trade-mark

With Every Sprayer You Get a Supply of

GREEN CROSS AGRICULTURAL WEED-NO-MORE

(Original 40% BUTYL ESTER OF 2,4-D)

Cockerel Chicks

Many poultry producers buy their breeding cockerals as ROP wing banded baby chicks and raise them with the home flock. The supply of these wing banded chicks is not very plentiful, especially in some breeds. Producers who intend to order them should do so as early as possible.

Unfortunately many producers order about 300 pullet chicks and 50 cockerel chicks to be brooded together until they are old enough to do without heat and can be reared separately. By not ordering the cockerel chicks in time to get delivery at the same time as the pullets and by putting the baby cockerels in with a large number of older pullet chicks, the cockerels do not get a proper start.

Where only a few cockerel

chicks are being ordered and they are to be brooded with a far larger number of pullet chicks, the cockerels should not arrive later than the pullets. In fact it would be better if they were two or three days older than the pullet chicks.

There are two children's hospitals in China to care for 200,000 children. The Canadian Appeal for Children seeks to better that record. Send your donation NOW!

Local curlers are participating in the Royal Cup competition at the local rink.

EATON'S

RULES IN CASE OF FIRES

1. Familiarize yourself with the location of windows and natural escapes.
2. Learn the position of all stairways, particularly the top landing and scuttle to the roof.
3. Keep the doors of rooms shut.
4. Wet a towel, stuff it in the mouth, breathe through it instead of nose, so as not to inhale smoke.
5. Never get excited, try to recall the means of exit.
6. If room fills with smoke keep close to the floor and crawl along by the walls to the window.
7. NEVER go to roof, unless as a last resort and you know there is escape to adjoining buildings.
8. NEVER jump through flames in a building without covering the head with a blanket or heavy clothing.
9. Open windows from the top.

NEW OFFICERS of the Western Stockgrowers' Association elected at Lethbridge included, (left), C. H. McKinnon, Dalemead, Alta.; (centre), K. Koppock, Calgary, secretary, and Tom Usher, Scollard, retiring president.

NEW EXECUTIVE—The newly elected executive of the United Farm Women of Alberta, left to right: Mrs. W. C. Taylor, Wainwright, vice-president; Mrs. M. E. Lowe, Nampa, president; Miss Molly Coupland, Lethbridge.

'TEEN-AGE CUBAN GIRL IS ATOM PHYSICIST—Science of the atom will be studied by Gladys Diaz de los Arcos, 17-year-old Cuban girl, who already has won 24 prizes for scientific articles she has written. She will attend college in U.S. on scholarship given by business and professional women.

TRAINING GROUNDS for paratroopers, Camp Shilo is a big artillery camp. Here troops in summer manoeuvres are under simulated battle conditions at the big centre.

RENOUNCES DANISH TITLES TO MARRY—Prince Olaf, cousin of King Frederik of Denmark, is shown in Copenhagen with his bride-to-be, Annie Pugaard Moeller, a commoner. The prince, who renounced all his royal titles when he announced his forthcoming marriage, and his future wife were invested with the title of Count and Countess of Rosenborg.

QUEEN ERINDALE—Crowned queen of the first ice carnival to be held on the new community rink at Erindale, Ont., Catherine Hunter, 17, also gained the title "Miss Erindale". Children took part in the show and many out-of-towners were on hand for the celebration.

A RIDE BEHIND HUSKIES suggests all sorts of adventure in bleak regions of great distances but this lady and her escort seem to be enjoying an outing near home just for the fun of it.

FUMES KILL THREE YOUNGSTERS—Dorothy June Brown, 12, of Humberstone, Ont., was one of three youngsters who died from carbon monoxide fumes from a ventless gas hot water heater. Dorothy was babysitter in the home of Wilfrid Eden for a five-months-old girl, Marion Elaine Eden, and Carol Anne Eden, age 8.

IDEAL WEATHER LURES SKIERS TO THE HILLS—Plenty of snow and ideal weather across Canada has proved irresistible lure for skiers who have swarmed out to hills and mountains in great numbers. The above young lady is seen with her hickories preparing for one of Canada's thrilling sports.

BUSINESS MANAGER FIXES EVERYTHING—Hollywood's Lizabeth Scott has money problems. She claims she didn't save a cent of her earnings last year, so she hired a business manager. Now she's on a budget. He allows her \$12 spending money a week.

LIKES HIS BOTTLE—The "kid" certainly relishes his bottle, and the seven-year-old son of Mrs. Charles Essery, R.R. 1, Saanichton, B.C., enjoys playing nurse to this healthy looking baby. The picture was taken at the home of the boy's grandfather, Mr. Richardson, Duncan, B.C.

FARMER SHOTS DEFIANT WOLF—Wolf shot by Arnold Fish near Trafalgar, Ont., farm is shown beside Roy Fish, (right), father of marksman, and Bill Kelly a neighbor. Wolf was shot twice after several hours' stalking. Coming face-to-face with the wolf, Fish shot it "through the middle", but it continued to advance as if nothing had hit him. Undaunted, Fish raised his rifle again, and this time downed the animal with a bullet in the neck.

BIRTHDAY PARTY FOR DOT-TIE'S SON—Celebrating his second birthday, John Ridgely is helped by his mother, Dorothy Lamour, to blow out the candles on his cake. The screen actress, in private life Mrs. William Howard III, finished final scenes of her latest movie just in time to get home and serve the cake and ice cream.

THE FARMERS' EXCHANGE

FARMER'S COLUMN

By R. J. Milligan

Our last article dealt with some ideas on soil conservation, and why such conservation is necessary. Assuming therefore that all our farmers are going to practice soil conservation let's offer a few ideas on how to accomplish this general practice.

At the outset we must try to avoid too many cultivations. Our modern machinery tends to pull or break the soil apart. If we do this we hasten soil and fiber decomposition. One simple way to help our soil conservation program is to slow our tractor speeds to a maximum of four miles per hour. Again if possible let us make more use of the duckfoot cultivator or Noble Blade Weeder. Both leave the trash on the surface of our land. One of the best ideas for soil conservation is to maintain a heavy trash cover.

The farmer is a person who has to find things out for himself. One thing he learned from bitter experience was that strip farming cannot be practiced successfully when trying to combat or contend with Saw Flies. Therefore he had to go back to the large fields, thus exposing smaller areas to the ravages of the Saw Flies. By enlarging his fields he experienced difficulties caused by soil blowing again. In order to prevent the wind erosion he discovered a trash cover would keep his land from blowing and the trash also permitted rapid absorption of moisture. Bare summerfallow does not absorb rain at a rapid rate, but if a trash of one inch is present the heavy rain is held in the trash and does not run off. In some areas the stubble lands are given a once over with the Blade Weeder in the fall which leaves the stubble more or less undisturbed and loosens and aerates the soil to the depth the Noble Blade has been operated. Another thing to remember is that soil, in its loosened condition permits rapid absorption of the melting snow. We all know that bare summerfallow lets a lot of the melting snow run off and accumulate in hollows and slough bottoms. Even a heavy cover crop does not stop this run-off. An objection to a cover crop is that it uses up plant food and moisture that was supposedly prepared for next year's crop.

Heavy rain or rapidly melting snow will wash rills which become deeper and wider making it rough for tractor operation and as the years pass on, these rills become gullies. Soil moved in this way is lost to the farmer, the province, and the nation. Trash covers and regressed natural drains will lessen the water erosion.

Here's an angle that hasn't been explored to the fullest extent. Why not spray our land to be summerfallowed rather than till or cultivate early in the spring? The growth of weeds that has been destroyed by the 2,4-D spray coupled with the growth of wild oats and volunteer grain will help to create the trash we want and need. The later material can be pastured off. During July when it is hot, one cultivation will destroy the growth of cereals if they cannot be pastured off.
